EVELYN HÖRMANN | Germany

I love the non-objective painting. Lively, multi-layered surfaces, bright colours, interesting, often rough surfaces, different materials determine my painting. I work with pigments, acrylics and oils, metal powders, earth, coal, ashes. My way of working is very experimental. It always tempts me to discover something new and try something new. Most of my pictures go through a long working process. They are made from many layers of material, paint and glaze. The colour layers give them a very special luminosity.
